Starting from leaf samples students learned DNA extraction and QC; the development of custom pipelines for DNA sequence alignment, genotyping, and calling variants; and the use of several software packages to assess population structure and genetic diversity. This project is ongoing and is now led by several of the students that took the course.</li> </ul> <p><b>TEACHING ASSISTANT</b></p> <ul style="list-style-type: none"> <li>▪ Evolutionary Biology</li> <li>▪ Genetics</li> <li>▪ Genomics</li> </ul> <p><b>COURSE DEVELOPMENT</b></p> <ul style="list-style-type: none"> <li>▪ Population Genetics web applications</li> </ul>
